REVIEW FOR EXAM

- **redo tests and read over notes**
- **look for areas of weakness from tests, homework, notes**
- **work on questions from <u>all</u> topics, but focus on weaknesses**
- **consider making a cheat/summary sheet; this process will help organize your thinking and also provide a quick-reference sheet as you study**
- **help others; explaining a concept will force you to organize your own thinking and solidify your understanding of a topic**

**These textbook questions are multiple choice. Solve them as regular problems. Do not use the multiple choice options as a crutch.

Functions / R.O.C. / Polynomial Functions
p.188 #1,2,4,6,8-11,14,15,20,22,23,24,26-30

Polynomial Equations / Rational Functions / Trig Functions
p.380 #1,2,4,5,6,8-25,27

Trig Equations & Identities / Exponential & Logarithmic / Combinations
p.580 #1-6,8,9,11,12,14,16,18,19,21,22,26,29,31,32,34
